

EPI-RU-PDF Reader Block Enhancement

Background and strategic fit

In order to provide users with mobile devices the same experience as on desktop devices, there's a need to enhance existing 'PDF Reader Block' with the ability to preview attached PDF file on the mobile devices without needing to download file, the same as it's on the desktop currently.

Assumptions

- This is enhancement of already existing 'PDF Reader Block'

User Journey

#	Title	User Story	Importance	Notes
1	PDF Preview on Mobile Devices	As a user, when I'm browsing through HCP portal using my mobile device, and I encounter the attached PDF on certain page, I want to be able to click on 'Preview' button and PDF should open on my screen without need to download the whole file.	Must Have	<ul style="list-style-type: none">• Functionality should be working the same across all devices as it's currently working on desktop devices
